Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.
2. The disclosure is objected to because of the following informalities: In the specification page 1 paragraph 0002 US Patent Application Serial Numbers are missing. Appropriate correction is required.

Drawings

3. This application has been filed with informal drawings, which are acceptable for examination purposes only. Formal drawings will be required when the application is allowed.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Art Unit: 2155

5. Claims 1-8 are rejected under 35 U.S.C. 102(e) as being anticipated by Putzolu (U.S. Patent No. 6,578,076). Putzolu's patent meets all the limitations for claims 1-8 recited in the claimed invention.

6. As to claim 1, Putzolu teaches a method in a client-server environment, to manage a configuration of resources on at least one client system (see abstract; figure 1; and column 2 line 53 to column 3 line 48), the method on a client system comprising: receiving at least one local run-time environmental condition (policy) including at least one condition including a wildcard to determine whether one or more selectable configuration settings are applied on the client system, wherein the one or more selectable configuration settings are previously set graphically using a graphical user interface with one or more user selectable configuration settings therein; and determining if the environmental condition is met with the wildcard then applying at least one of the one or more selectable configuration settings on the client system (figures 1 and 5; column 4 line 8 to column 5 line 15; and column 7 line 21 to column 8 line 29).

7. As to claims 2-4, Putzolu teaches that the local run-time environmental condition (policy) including wildcards that filled information relating to bandwidth, time, sink of traffic (length dependent); requester/source identity (length independent); and network resource sought to be accessed, identity of entity requesting access to network resource (DOS type) (column 4 line 8 to column 5 line 15; and column 7 line 21 to column 8 line 29).

8. As to claims 5-8, Putzolu teaches that the determining if the environmental condition is met with the wildcard is a value for one or more environmental conditions of
